Atlantis Investment Management is an independent asset management firm based in Hong Kong. Founded in London in 1994 by three ex-Schroders star managers, Atlantis is now headed by legendary investor Yang Liu.

We are looking for an **Assisting Portfolio Manager/Sr. Analyst**. The person will be tasked with responsibilities in managing existing quantitative strategies, automating investment processes, conducting independent research on trading signals as well as on model/portfolio construction techniques. The person is expected to have sound knowledge in fixed income securities and associated derivatives. He/she needs to be comfortable with programming and data analytics. Any macro-economic, multi-asset background will be a plus. Although work in the group is typically collaborative, everyone in the team is expected to be intellectually independent self-starters. It is essential that the candidate possess the following skills/qualifications:

- Advanced educations in one of the following subject areas including statistics, a quantitative science, computer science, engineering, etc.
- Working knowledge in Fixed Income products and associated derivatives, ideally experienced in trading and/or pricing models.
- Quantitative experiences or knowledge in statistical modeling, and/or machine learning techniques
- Knowledge of software development concepts and ability to code in one of following software packages: R, Python, VBA, SQL
- Experiences with processes of large datasets. Familiarity with financial data such as Factset, Bloomberg, Thomson Reuters, etc. will be a plus (but not necessary)
- Good oral and technical writing skills

Interested candidates please send your details to HR@atlantisinvestment.com.
